

Founded in 1944, **the Institute for Western Affairs** is an interdisciplinary research centre carrying out research in history, political science, sociology, and economics. The Institute's projects are typically related to German studies and international relations, focusing on Polish-German and European issues and transatlantic relations. The Institute's history and achievements make it one of the most important Polish research institutions well-known internationally. Since the 1990s, the watchwords of research have been *Poland– Germany – Europe* and the main themes are:

- political, social, economic and cultural changes in Germany;
- international role of the Federal Republic of Germany;
- past, present, and future of Polish-German relations;
- EU international relations (including transatlantic cooperation);
- borderlands: social, political and economic issues.

The Institute's research is both interdisciplinary and multidimensional. Its multidimensionality can be seen in published papers and books on history, analyses of contemporary events, comparative studies, and the use of theoretical models to verify research results.

The Institute houses and participates in international research projects, symposia and conferences exploring key European questions and cooperates with many universities and academic research centres.
